PROFESSIONAL SUMMARY

Network and Systems Engineer with hands-on experience managing enterprise datacenter infrastructure. Skilled in Linux and Windows server administration, VMware virtualization stacks, and network security implementation. Operational expertise with infrastructure monitoring platforms, centralized log aggregation, and containerized application support. Background in full-stack development and foundational networking knowledge.

WORK EXPERIENCE

Associate Network & System Engineer *Aug 2025 – Present*

Cloud Himalaya Pvt. Ltd. ▪ Thapathali, Kathmandu

- Manage production Linux servers (Ubuntu, RHEL) and Windows Server environments; perform system hardening, patch management, user provisioning, and performance optimization across distributed infrastructure.
- Configure and monitor Zabbix and Nagios deployments for real-time visibility into system metrics, application health, and network performance; establish custom alert thresholds and integration with incident management.
- Enforce security policies on Fortinet FortiGate and Checkpoint Firewalls; manage firewall rules, NAT configurations, VPN connectivity, and network segmentation across multiple sites.
- Maintain VMware infrastructure including vCenter management, VM lifecycle operations, resource allocation, snapshot creation/rollback, and ESXi host administration.
- Develop and troubleshoot CI/CD workflows with GitHub Actions; containerize applications using Docker and orchestrate deployments via Kubernetes; manage image registries and application versioning.
- Track infrastructure changes and manage configurations using Git version control; document procedures and maintain runbooks for operational consistency.
- Support datacenter capacity planning and infrastructure refresh initiatives; participate in incident response for critical production systems.

Network Administration Intern *May 2025 – Aug 2025*

Times Global Pvt. Ltd. ▪ Dhumbarahi, Kathmandu

- Assisted with datacenter rack configuration, cabling infrastructure, and network device deployment; participated in decommissioning and asset inventory procedures.
- Gained exposure to Cisco routing and switching concepts; performed basic IOS configuration and troubleshooting of network connectivity issues.
- Supported network operations including log review, alert monitoring, and escalation of network-related incidents to senior operations staff.

PROJECTS

Smart Log Monitoring System (SLMS)

Centralized log management platform for Linux and Windows servers with ML-based anomaly detection, real-time log aggregation, and automated alerting. Responsible for configuration, monitoring dashboards, alert tuning, and incident response integration.

Visitor Management System (VMS)

Digital access control system for datacenter infrastructure. Deployed VMS to replace manual visitor logs with automated digital records, device tracking, and gatepass issuance. Administered check-in/check-out operations and access compliance monitoring.

TECHNICAL SKILLS

Operating Systems	Ubuntu 20.04/22.04, RHEL, Debian, Windows Server 2016/2019/2022
Virtualization	VMware vCenter, vSphere, ESXi — VM provisioning, snapshots, resource pools
Log Management	SLMS (Smart Log Monitoring System) — centralized log aggregation, ML anomaly detection, real-time alerting for Linux & Windows
Monitoring	Zabbix, Nagios — host/service monitoring, dashboards, alert configuration
Firewall & Security	Fortinet FortiGate, Checkpoint — policy management, NAT, VPN, network segmentation
Containers & CI/CD	Docker, Kubernetes (K8s), GitHub Actions — containerization, orchestration, pipeline automation
Networking	TCP/IP, VLANs, Routing & Switching, Firewall basics, Cisco Packet Tracer, VPN
Version Control	Git, GitHub — branching strategies, pull requests, infra config management
Web Development	React, JavaScript (ES6+), HTML5, CSS3, Node.js, Express.js, PHP

EDUCATION

Bachelor of Computer Application(BCA)

Kathford College of Engineering & Management

Tribhuvan University | Balkumari, Lalitpur

2021 – 2026

High School — Computer Science

St. Xavier's School Godavari

Godawari-03, Lalitpur

2019 – 2021

TRAINING & CERTIFICATIONS

Frontend Development with React *3 months*

Kathford Engineering College

Component-based UI development, responsive design, and modern JavaScript using React.

Networking Basics *Self-paced*

Cisco NetAcad

Network fundamentals, IP addressing, basic routing and switching, and core networking principles.
